ENGINEERING AND TECHNOLOGY DEGREES
1984

PART I—BY SCHOOL
Summary Data by School, Curriculum Group and Degree Level

ENGINEERING MANPOWER COMMISSION

A Commission of the Engineering Affairs Council
of the
American Association of Engineering Societies, Inc.

ENGINEERING AND TECHNOLOGY DEGREES
1984

PART I

© 1984 by the American Association of Engineering Societies, Inc.

As it is the objective of AAES, Inc. publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations thay may have influenced positions taken or advocated in these materials.

ISBN 0-87615-045-8

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1984 OFFICERS

Nicholas J. Radell
Chairman

James Y. Oldshue
Chairman-Elect

John A. White
Secretary/Treasurer

Robert M. Saunders
Past-Chairman

Daniel V. DeSimone
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1984 OFFICERS

William E. Carew
Chairman

Edward J. Doyle
Vice-Chairman

Patrick J. Sheridan
Secretary/Treasurer

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

1984

ENGINEERING DEGREES 7

Bachelor's Degrees in Engineering by School - 1983-84 9
  Minority Classifications, Women and Foreign Nationals Summary 16

Master's Degrees in Engineering by School—1983-84 17
  Minority Classifications, Women and Foreign Nationals Summary 23

Engineer (Professional) Degrees by School - 1983-84 24
  Minority Classifications, Women and Foreign Nationals Summary 25

Doctorate Degrees in Engineering by School - 1983-84 26
  Minority Classifications, Women and Foreign Nationals Summary 30

Total for all engineering Degrees - 1983-84 31

ENGINEERING TECHNOLOGY DEGREES 33

Certificates in Engineering Technology by School - 1983-84 35
  Minority Classifications, Women and Foreign Nationals Summary 35

Associate Degrees in Engineering Technology by School - 1983-84 36
  Minority Classifications, Women and Foreign Nationals Summary 41

Bachelor's Degrees in Engineering Technology by School-- 1983-84 42
  Minority Classifications, Women and Foreign Nationals Summary 45

Master's Degrees in Engineering Technology by School - 1983-84 46
  Minority Classifications, Women and Foreign Nationals Summary 46

Total for all Engineering Technology Degrees - 1983-84 47

Engineering Degrees by Curriculum and Degree Level - 1983-84 48

Engineering Technology Degrees by Curriculum and Degree Level - 1983-84 49

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Dr. Paul Doigan, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based.

INTRODUCTION

Following the format established in 1976, this report on engineering and engineering technology degrees awarded in 1984 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and engineering technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering and engineering technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Blacks, Hispanic, American Indian, and Asian/Pacific), women, and foreign national students included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and engineering technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and engineering technology curricula groups is presented in alphabetical order, listing the schools offering the programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the number of students from the six special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation designation for specific curricula is indicated for each curriculum. A final set of tables summarize degrees at all levels of engineering and engineering technology according to the detailed curricula titles.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. Inconsistencies in the data submitted have been corrected, and related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specific program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Degrees-1984 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

EXPLANATION OF PART I

This part of the report provides data on the number of engineering and technology degrees granted, for the school year ending June, 1984. Tables appear for the following degree levels.

- Engineering Degrees
    - Bachelor's
    - Master's
    - Engineer (Professional)
    - Doctor's
- Engineering Technology Degrees
    - Certificate
    - Associate
    - Bachelor's
    - Master's

The engineering tables consist of data from schools known by the Engineering Manpower Commission to offer engineering degrees beginning at the bachelor's level. The data are essentially complete for all engineering schools in the United States. Data are presented according to major curricula categories.

The engineering technology tables show data for selected schools, including all schools on the ABET accreditation lists for 1984. Data are again presented by major categories.

Unlike the totals for engineering degrees, the engineering technology degree totals do not represent national totals because they include only selected schools responding to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1984 engineering technology degree data totals are not directly comparable to previous years' data because of variations in the schools responding each year.

Following the totals for each degree level, data for the six special categories of students are summarized for the curricula categories. Complete data supporting this summary information are provided in Part II; Part III gives more detailed information by curriculum, grouped under major categories.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1—School.
Schools are listed alphabetically by state, followed by a total for that state.

Column 2—Accreditation and Control (AC).
The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list). Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing to the left of a number indicates that the number is an estimate. In several cases, the estimate is 1983 data, as indicated below under the heading of "Estimated Data".

The remaining columns give the number of degrees awarded by each school by major curriculum group, as follows:

Engineering Degree Catgegories

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1983 report has been substituted for these institutions:

Arkansas Technical University
Calif. State Poly University, Pomona
Calif. Polytechnic State Univ.,
  San Luis Obispo
U.S. Air Force Academy
Bridgeport Engrg. Inst.
University of Delaware
Southern Illinois University
Southeastern Massachusetts Univ.
University of Detroit
Oakland University
North Carolina A&T
Fairleigh Dickinson
City College of CUNY
Hofstra University
Pratt Institute
SUNY at Buffalo
SUNY College of Env. Sci & Forestry
Cleveland Oklahoma State Univ.
Grove City College
Philadelphia Coll of Textiles
University of Rhode Island
University of Tennessee, Chattanooga
University of Utah
Seattle Pacific Univ.
St. Martins College

Previous year's data is indicated in this report by an asterisk (*) appearing before the substituted entry.

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1983 report has been substituted for these institutions:

Southeastern Massachusetts Univ.
Wayne State University
Jefferson College
Longview Community College
Atlantic Community College
New Hampshire Tech. Inst.
Mercer County Comm. Coll.
CCNY
Technical Career Institutes
Cape Fear Technical Inst.
Central Carolina Tech. Inst.
Guilford Tech. Institute
Cincinnati Technical College
Sinclair Community College
Mt. Hood Community College
Oregon Inst. of Technology
Spartanburg Tech. College
Tri-County Tech. College
University of South Dakota
Roane State Comm. Coll.
Milwaukee School of Engineering

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

Humboldt State
Northrop
Providence

The following ABET-accredited engineering technology schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication.

City College of San Francisco, CA
Northrop, Ca
Mesa College, CA
Western Kentucky, KY
Montgomery College, MD
Prince George's CC, MD
Delta College, MI
Southwest St., MN
Forsyth Tech. Inst., NC
Sandhills CC, NC
Asherville Buncombe, NC
Shawnee St., OH
Harrisburg Area CC, PA
Trident Tech., SC
Knoxville St. Tech., TN
Houston, Downtown, TX
Milwaukee Area Tc, WI

These schools are listed in the report with "XX" following the school name to indicate where their data would have appeared. An estimate of the combined data for these schools appears at the end of each section of the report under the heading of "XX All Unreported".

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Dr. Paul Doigan, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based.

INTRODUCTION

Following the format established in 1976, this report on engineering and engineering technology degrees awarded in 1984 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and engineering technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering and engineering technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Blacks, Hispanic, American Indian, and Asian/Pacific), women, and foreign national students included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and engineering technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and engineering technology curricula groups is presented in alphabetical order, listing the schools offering the programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the number of students from the six special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation designation for specific curricula is indicated for each curriculum. A final set of tables summarize degrees at all levels of engineering and engineering technology according to the detailed curricula titles.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. Inconsistencies in the data submitted have been corrected, and related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specific program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Degrees-1984 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

EXPLANATION OF PART II

This part of the report provides data on the number of engineering and technology degrees granted, for the school year ending June 1984. Tables appear for the following degree levels:

- Engineering Degrees
  - Bachelor's
  - Master's
  - Engineer (Professional)
  - Doctor's

- Engineering Technology Degrees
  - Certificate
  - Associate
  - Bachelor's
  - Master's

The engineering tables consist of data from schools known by the Engineering Manpower Commission to offer engineering degrees beginning at the bachelor's level. The data are essentially complete for all engineering schools in the United States. Data are presented according to major curricula categories.

The engineering technology tables show data for selected schools, including all schools on the ABET accreditation lists for 1984. Data are again presented by major categories.

Unlike the totals for engineering degrees, the engineering technology degree totals do not represent national totals because they include only selected schools responding to the survey. They is no way of knowing how many additional degrees may have been awarded by other schools. The 1984 engineering technology degree data totals are not directly comparable to previous years' data because of variations in the schools responding each year.

Complete data for all students combined are provided in Part I containing summary data by school, curriculum group and degree level; Part III gives more detailed data by curriculum, grouped under major categories.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1—School.
Schools are listed alphabetically by state, followed by a total for that state.

Column 2—Accreditation and Control (AC).
The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list). Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing to the left of a number indicates that the number is an estimate. In several cases, the estimate is 1983 data, as indicated below under the heading of "Estimated Data".

The remaining columns give the number of degrees awarded by each school by major curriculum group, as follows:

Engineering Degree Catgegories

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1983 report has been substituted for these institutions:

- Arkansas Technical University
- Calif. State Poly University, Pomona
- Calif. Polytechnic State Univ., San Luis Obispo
- U.S. Air Force Academy
- Bridgeport Engrg. Inst.
- University of Delaware
- Southern Illinois University
- Southeastern Massachusetts Univ.
- University of Detroit
- Oakland University
- North Carolina A&T
- Fairleigh Dickinson
- City College of CUNY
- Hofstra University
- Pratt Institute
- SUNY at Buffalo
- SUNY College of Env. Sci & Forestry
- Cleveland Oklahoma State Univ.
- Grove City College
- Philadelphia Coll of Textiles
- University of Rhode Island
- University of Tennessee, Chattanooga
- University of Utah
- Seattle Pacific Univ.
- St. Martins College

Previous year's data is indicated in this report by an asterisk (*) appearing before the substituted entry.

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1983 report has been substituted for these institutions:

Southeastern Massachusetts Univ.
Wayne State University
Jefferson College
Longview Community College
Atlantic Community College
New Hampshire Tech. Inst.
Mercer County Comm. Coll.
CCNY
Technical Career Institutes
Cape Fear Technical Inst.
Central Carolina Tech. Inst.

Guilford Tech. Institute
Cincinnati Technical College
Sinclair Community College
Mt. Hood Community College
Oregon Inst. of Technology
Spartanburg Tech. College
Tri-County Tech. College
University of South Dakota
Roane State Comm. Coll.
Milwaukee School of Engineering

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

Humboldt State
Northrop
Providence

The following ABET-accredited engineering technology schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication.

City College of San Francisco, CA
Northrop, Ca
Mesa College, CA
Western Kentucky, KY
Montgomery College, MD
Prince George's CC, MD
Delta College, MI
Southwest St., MN
Forsyth Tech. Inst., NC
Sandhills CC, NC

Asherville Buncombe, NC
Shawnee St., OH
Harrisburg Area CC, PA
Trident Tech., SC
Knoxville St. Tech., TN
Houston, Downtown, TX
Milwaukee Area Tc, WI

These schools are listed in the report with "XX" following the school name to indicate where their data would have appeared. An estimate of the combined data for these schools appears at the end of each section of the report under the heading of "XX All Unreported".

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

Engineering Curricula by School - 1983-84 7
Engineering Technology Curricula by School - 1983-84 41
Engineering and Engineering Technology Curricula by Degree 63
Engineering Degrees by Curriculum and Degree Level - 1983-84 85
Engineering Technology Degrees by Curriculum and Degree Level - 1983-84 86

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Dr. Paul Doigan, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based.

INTRODUCTION

Following the format established in 1976, this report on engineering and engineering technology degrees awarded in 1984 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and engineering technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering and engineering technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Blacks, Hispanic, American Indian, and Asian/Pacific), women, and foreign national students included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and engineering technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and engineering technology curricula groups is presented in alphabetical order, listing the schools offering the programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the number of students from the six special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation designation for specific curricula is indicated for each curriculum. A final set of tables summarize degrees at all levels of engineering and engineering technology according to the detailed curricula titles.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. Inconsistencies in the data submitted have been corrected, and related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specific program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Degrees-1984 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

EXPLANATION OF PART III

This part of the Engineering and Technology Degrees report presents the 1984 degree data grouped under more detailed curricula headings than Parts I and II. Taking each of the different curricula in turn, the tables list all schools reporting degrees in that field, the number of degrees awarded at each level, and the number of degrees received by the six special categories of students.

The curricula titles include the exact title provided by each school. This allows for specific or specialized reporting of programs. The tables also indicate those curricula that are accredited by the Accreditation Board for Engineering and Technology (ABET) according to the following codes:

B = accredited at bachelor's degree level
M = accredited at master's degree level
A = accredited at associate's degree level.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1—School.
Schools are listed alphabetically by state, followed by a total for that state.

Column 2—Accreditation and Control (AC).
The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list). Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing to the left of a number indicates that the number is an estimate. In several cases, the estimate is 1983 data, as indicated below under the heading of "Estimated Data".

The remaining columns give the number of degrees awarded by each school by major curriculum group, as follows:

Engineering Degree Catgegories

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1983 report has been substituted for these institutions:

Arkansas Technical University
Calif. State Poly University, Pomona
Calif. Polytechnic State Univ.,
  San Luis Obispo
U.S. Air Force Academy
Bridgeport Engrg. Inst.
University of Delaware
Southern Illinois University
Southeastern Massachusetts Univ.
University of Detroit
Oakland University
North Carolina A&T
Fairleigh Dickinson
City College of CUNY
Hofstra University
Pratt Institute
SUNY at Buffalo
SUNY College of Env. Sci & Forestry
Cleveland Oklahoma State Univ.
Grove City College
Philadelphia Coll of Textiles
University of Rhode Island
University of Tennessee, Chattanooga
University of Utah
Seattle Pacific Univ.
St. Martins College

Previous year's data is indicated in this report by an asterisk (*) appearing before the substituted entry.

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1983 report has been substituted for these institutions:

Southeastern Massachusetts Univ.
Wayne State University
Jefferson College
Longview Community College
Atlantic Community College
New Hampshire Tech. Inst.
Mercer County Comm. Coll.
CCNY
Technical Career Institutes
Cape Fear Technical Inst.
Central Carolina Tech. Inst.
Guilford Tech. Institute
Cincinnati Technical College
Sinclair Community College
Mt. Hood Community College
Oregon Inst. of Technology
Spartanburg Tech. College
Tri-County Tech. College
University of South Dakota
Roane State Comm. Coll.
Milwaukee School of Engineering

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

Humboldt State
Northrop
Providence

The following ABET-accredited engineering technology schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication.

City College of San Francisco, CA
Northrop, Ca
Mesa College, CA
Western Kentucky, KY
Montgomery College, MD
Prince George's CC, MD
Delta College, MI
Southwest St., MN
Forsyth Tech. Inst., NC
Sandhills CC, NC
Asherville Buncombe, NC
Shawnee St., OH
Harrisburg Area CC, PA
Trident Tech., SC
Knoxville St. Tech., TN
Houston, Downtown, TX
Milwaukee Area Tc, WI

These schools are listed in the report with "XX" following the school name to indicate where their data would have appeared. An estimate of the combined data for these schools appears at the end of each section of the report under the heading of "XX All Unreported".

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

Engineering Technology Degrees by Curriculum and Degree Level—1984-85 48

INTRODUCTION

This report summarizes data on degrees awarded in engineering and engineering technology during the 1984-85 academic year. The survey covers 289 institutions offering degrees in engineering, providing comprehensive coverage of these programs in the United States. The Engineering Manpower Commission (EMC) has provided this kind of data on four-year undergraduate and graduate engineering degrees since 1967, and in general our reports on these degrees are comparable from one year to the next.

In the case of the technology degrees, EMC's data is less comprehensive. The survey covers schools with at least one ABET-accredited course of study. It also includes some degrees awarded by schools that do not have ABET-accredited courses. Since EMC has not attempted to provide 100 percent coverage of the unaccredited engineering technology programs, data for those degrees is not comparable from one year to the next.

As in the past EMC's degree report is issued in three separate volumes. Part I summarizes degrees for each school, in alphabetic order for each state, with columns for major curriculum groups, totals for the schools and states, and information on each school's accreditation and type of control (public, private, etc.). Separate tables are provided for engineering degrees at the bachelor, masters, engineering professional and doctorate levels, and for engineering technology degrees at the certificate, associate, bachelor and masters levels.

At the end of the tabulations for each degree level in Part I, a brief summary is appended of the overall numbers, across all schools and states, of degree recipients who were women, members of any of four specific minority groups (Blacks, Hispanics, American Indians, and Asians/Pacific Islanders), or foreign nationals. For more detailed school, state, and curriculum-specific data on the six groups of special interest, the separate Part II report for minorities provides information similar to the Part I tables for each of these groups of engineers.

Part III of the report, also separately bound, provides added details on curricula in engineering and engineering technology. Each of the major disciplinary groups is tabulated in alphabetic order, listing schools offering the programs and the particular program titles assigned by the schools, along with the number of degrees awarded at each level and the number of recipients at the school in each of the six special population categories. The ABET (Accreditation Board for Engineering and Technology) designation for each program is also reported. A final table summarizes all program titles within each of the major curriculum groups, listing total degrees of all types for all schools and states.

Thorough efforts have been made to eliminate errors in these statistics. Data for each school have been reviewed and compared with previous degree reports (and enrollment reports, in some cases), to isolate any unexpected or surprising changes in the production of engineering and engineering technology graduates. In a number of cases, reporting errors were identified and corrected, while in others some significant changes in patterns of degree production have been checked and confirmed. Insofar as practical, minor variations in the titles of programs (such as differences in the style of abbreviations) have been edited into a common format, to improve the clustering of similar programs in Part III of the report.

In addition, estimates and substitutions of prior year degree reports have been used, where feasible, to deal with missing data. The rules governing these adjustments are as follows:

- In the case of *engineering* degrees, schools that did not participate in the 1985 survey, but which did participate in 1984, are treated by substituting their 1984 reports for the missing information. Such schools are flagged with asterisks in the tabulations, to denote the presence of substituted 1984 data. A list of these schools appears below.

  Two schools, both members of the California State University system, submitted 1984 data for the 1985 survey. Both schools followed a similar practice in previous EMC degree studies. The use of the year-old data is explained by the schools as a function of their academic calendars. Both schools are tagged with the asterisks as substitutions, but in these cases the substitutions were initiated by the reporting institutions, not by EMC.

  A similar treatment is used for schools with *technology* programs that participated in the 1984 degree survey but did not respond in 1985, except that the substitutions are made only when the institution had at least one ABET-accredited program (both ABET-accredited and non-ABET schools are substituted, if necessary and if feasible, in the engineering degree tabulations.) These schools are also listed below.

- In the case of *engineering* degrees, when neither current nor prior-year data has been available, EMC has generated its own estimates for the total numbers of degrees awarded by all such institutions, entering in this adjustment as a separate line at the end of each set of tabulations. In the 1985 study, no engineering institution required this treatment (some schools did require estimates for missing data at the level of one or more of the six special groups, however; see below).

  In the case of the *technology* programs, a number of ABET-accredited schools were missing for both 1984 and 1985; however a review of the situation indicated that most of the missing programs were small, and it was concluded that estimates would not add appreciably to the accuracy of the results.

- In the case of *engineering* degrees, estimates have also been used to deal with problems of missing data at the level of special population groups. When the estimated data appears in tabulations, the school's name carries an "-x" suffix to flag the situation. Data cells for the school will still be reported as empty, but allowance for the school will have been made in the line at the end of the tabulation labeled "X—UNREPORTED GROUP ESTIMATE." In 1985, as noted above, these estimates appear only in tabulations of the special population groups; group estimates were not required for the overall "all graduates" level.

  In the case of the *technology* programs, EMC does not make estimates for unreported members of the six special population groups.

- Finally, some colleges were unable to provide complete details of their degree awards, but were able to supply accurate overall totals for such items as the number of women graduates at the master's level. Where feasible, EMC made use of such partial responses, pro-rating details by making use of previous degree reports, enrollment reports, and other information obtained from direct contacts with the reporting institutions. The number of these adjustments is small. They are not tagged as substitutions, nor are they flagged as estimates with the "-X" suffix after the school's name. Reports for total degrees in these cases will be accurate, although some errors may be introduced at the level of the detailed data because of the pro-rating process.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the reporting institutions.

For the convenience of users, the three parts of this report are available separately or as a set. Orders should be placed with the Publications Department, American Association of Engineering Societies, 415 2nd Street, N.E., Washington, D.C. 20002.

SUBSTITUTED DATA

No 1985 degree report was obtained by EMC for the following schools; however, 1984 reports were available, and were substituted for the missing data. When these schools appear in the tabulations, they are flagged with an asterisk (*) after the institutional "AC" (Accreditation and Control) code:

Engineering Schools

California State University at Chico*
California State University at Los Angeles*
California State Polytechnic University at Pomona**
Florida Atlantic University
Gannon University (Pennsylvania)
LaMar University (Texas)
Massachusetts Maritime Academy
Michigan Technological University
Northern Arizona University
Pacific Lutheran University (Washington)
Rensselaer Polytechnic Institute (New York)
St. Marys University (Texas)
Tuskegee Institute (Alabama)
United States Coast Guard Academy (Connecticut)
University of Alaska at Fairbanks
University of Arizona
University of Central Florida
University of Dayton (Ohio)
University of Hartford (Connecticut)
University of Lowell (Massachusetts)**
University of Miami (Coral Gables)
University of Nevada School of Mines
University of North Carolina at Chapel Hill
University of Santa Clara (California)
University of Wisconsin at Platteville
University of Wyoming

*School submitted 1984 data for 1985 survey.
**School submitted *updated* 1984 report too late to be used for that study; this updated report is used as a 1985 substitution here, which is why the substituted data is not identical to EMC's published 1984 results.

Technology Schools

(NOTE: substitutions for engineering technology schools were made only for institutions with at least one ABET-accredited course of study)

Alamance Technical College (North Carolina)
Colorado Technical College
Del Mar College (Texas)
Erie Community College (New York)
Florence Darlington College (South Carolina)
Florida International University
Franklin University (Ohio)
Greenville Technical College (South Carolina)
Guilford Technical Community College (North Carolina)
Hartford State Technical College (Connecticut)
Lawrence Institute of Technology (Michigan)
Murray State University (Kentucky)
Niagara Community College (New York)
Northern Arizona University
Norwalk State Technical College (Connecticut)
Owens Technical College (Ohio)
Rochester Community College (Minnesota)
Savannah State College (South Carolina)
SUNY A&T College at Farmingdale (New York)
Temple University (Pennsylvania)
Tri-Cities State Technical College (Tennessee)
University of Hartford (Connecticut)
University of Cincinnati (Ohio College of Applied Science)
Wake Technical College (North Carolina)

MISSING DATA

Engineering Schools

In 1985, all engineering schools tracked by EMC's degree survey supplied at least partial data (in a few cases, by telephone) or could be covered by substituting a 1984 degree survey response, as noted above. Accordingly, no estimates are needed for unreported data for all engineering graduates. Limited estimates are used in the engineering degree tabulations to deal with partial missing information on women, minorities, or foreign nationals, as noted in the Introduction.

Technology Schools

The following engineering technology schools with at least one ABET-accredited course of study were unable to supply data for EMC degree surveys in either 1984 or 1985, and no data on those graduates are included in this report.

Auburn University (Alabama)
Atlantic Community College (New Jersey)
Central Maine Vocational-Technical Institute
City College of San Francisco (California)
College of Staten Island (New York)
Houston Community College (Texas)
John Tyler Community College (Virginia)
Mankato Community College (Minnesota)
Montgomery Community College (Maryland)
New Hampshire Technical Institute
Ocean County Community College (New Jersey)
Purdue University at Kokomo (Indiana)
Roane State Community College (Tennessee)
Sumter Area Technical College (South Carolina)
SUNY College of Technology at Utica (New York)
Technical Career Institute (New York)
University of Delaware
University of Houston, Downtown Campus, (Texas)
Waters State Community College (Tennessee)
York Technical College (South Carolina)

Miscellaneous Notes

A technical change in reporting methods accounts for a drop of approximately 650 engineering B.S. degrees between 1984 and 1985, due to the adoption by the U.S. Military Academy at West Point of a system of elective major fields. In the past all of West Point's graduates were counted in engineering science. Under the new system, only one-third are classed as engineers, and these include civil, electrical, general and mechanical engineers as well as graduates in engineering science.

Schools that participated in "3-2" engineering programs, in which the initial three years of an engineering curriculum are taught locally, and the final two years are taken at traditional engineering institutions, are not included in this report. In 1984, one such school, Providence College in Rhode Island, was erroneously listed by EMC as missing from the data.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Program-level ABET Accreditation Codes: in the curriculum tables provided in Part III of this report, each program is tagged as to its status with The Accreditation Board for Engineering and technology (ABET). The codes are:

B = ABET-accredited, at bachelor degree level
M = ABET-accredited, at masters' level (such accreditations are being phased out.)
A = ABET-accredited, at associate degree level
N = Not ABET-accredited.

School-level Accreditation and Control (AC) Codes: These appear after each school's name. The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list, which was applicable for these programs at the time of the survey.) Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing next to the "AC" Code indicates that 1984 data has been used as the best estimate for 1985, as indicated above in the discussion of substitutions and estimates.

Engineering Degree Categories: The following abbreviations are used in the tables:

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories: a different set of abbreviations is used:

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

INTRODUCTION

This report summarizes data on degrees awarded in engineering and engineering technology during the 1984-85 academic year. The survey covers 289 institutions offering degrees in engineering, providing comprehensive coverage of these programs in the United States. The Engineering Manpower Commission (EMC) has provided this kind of data on four-year undergraduate and graduate engineering degrees since 1967, and in general our reports on these degrees are comparable from one year to the next.

In the case of the technology degrees, EMC's data is less comprehensive. The survey covers schools with at least one ABET-accredited course of study. It also includes some degrees awarded by schools that do not have ABET-accredited courses. Since EMC has not attempted to provide 100 percent coverage of the unaccredited engineering technology programs, data for those degrees is not comparable from one year to the next.

As in the past EMC's degree report is issued in three separate volumes. Part I summarizes degrees for each school, in alphabetic order for each state, with columns for major curriculum groups, totals for the schools and states, and information on each school's accreditation and type of control (public, private, etc.). Separate tables are provided for engineering degrees at the bachelor, masters, engineering professional and doctorate levels, and for engineering technology degrees at the certificate, associate, bachelor and masters levels.

At the end of the tabulations for each degree level in Part I, a brief summary is appended of the overall numbers, across all schools and states, of degree recipients who were women, members of any of four specific minority groups (Blacks, Hispanics, American Indians, and Asians/Pacific Islanders), or foreign nationals. For more detailed school, state, and curriculum-specific data on the six groups of special interest, the separate Part II report for minorities provides information similar to the Part I tables for each of these groups of engineers.

Part III of the report, also separately bound, provides added details on curricula in engineering and engineering technology. Each of the major disciplinary groups is tabulated in alphabetic order, listing schools offering the programs and the particular program titles assigned by the schools, along with the number of degrees awarded at each level and the number of recipients at the school in each of the six special population categories. The ABET (Accreditation Board for Engineering and Technology) designation for each program is also reported. A final table summarizes all program titles within each of the major curriculum groups, listing total degrees of all types for all schools and states.

Thorough efforts have been made to eliminate errors in these statistics. Data for each school have been reviewed and compared with previous degree reports (and enrollment reports, in some cases), to isolate any unexpected or surprising changes in the production of engineering and engineering technology graduates. In a number of cases, reporting errors were identified and corrected, while in others some significant changes in patterns of degree production have been checked and confirmed. Insofar as practical, minor variations in the titles of programs (such as differences in the style of abbreviations) have been edited into a common format, to improve the clustering of similar programs in Part III of the report.

In addition, estimates and substitutions of prior year degree reports have been used, where feasible, to deal with missing data. The rules governing these adjustments are as follows:

- In the case of *engineering* degrees, schools that did not participate in the 1985 survey, but which did participate in 1984, are treated by substituting their 1984 reports for the missing information. Such schools are flagged with asterisks in the tabulations, to denote the presence of substituted 1984 data. A list of these schools appears below.

  Two schools, both members of the California State University system, submitted 1984 data for the 1985 survey. Both schools followed a similar practice in previous EMC degree studies. The use of the year-old data is explained by the schools as a function of their academic calendars. Both schools are tagged with the asterisks as substitutions, but in these cases the substitutions were initiated by the reporting institutions, not by EMC.

  A similar treatment is used for schools with *technology* programs that participated in the 1984 degree survey but did not respond in 1985, except that the substitutions are made only when the institution had at least one ABET-accredited program (both ABET-accredited and non-ABET schools are substituted, if necessary and if feasible, in the engineering degree tabulations.) These schools are also listed below.

- In the case of *engineering* degrees, when neither current nor prior-year data has been available, EMC has generated its own estimates for the total numbers of degrees awarded by all such institutions, entering in this adjustment as a separate line at the end of each set of tabulations. In the 1985 study, no engineering institution required this treatment (some schools did require estimates for missing data at the level of one or more of the six special groups, however; see below).

  In the case of the *technology* programs, a number of ABET-accredited schools were missing for both 1984 and 1985; however a review of the situation indicated that most of the missing programs were small, and it was concluded that estimates would not add appreciably to the accuracy of the results.

- In the case of *engineering* degrees, estimates have also been used to deal with problems of missing data at the level of special population groups. When the estimated data appears in tabulations, the school's name carries an "-x" suffix to flag the situation. Data cells for the school will still be reported as empty, but allowance for the school will have been made in the line at the end of the tabulation labeled "X—UNREPORTED GROUP ESTIMATE." In 1985, as noted above, these estimates appear only in tabulations of the special population groups; group estimates were not required for the overall "all graduates" level.

  In the case of the *technology* programs, EMC does not make estimates for unreported members of the six special population groups.

- Finally, some colleges were unable to provide complete details of their degree awards, but were able to supply accurate overall totals for such items as the number of women graduates at the master's level. Where feasible, EMC made use of such partial responses, pro-rating details by making use of previous degree reports, enrollment reports, and other information obtained from direct contacts with the reporting institutions. The number of these adjustments is small. They are not tagged as substitutions, nor are they flagged as estimates with the "-X" suffix after the school's name. Reports for total degrees in these cases will be accurate, although some errors may be introduced at the level of the detailed data because of the pro-rating process.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the reporting institutions.

For the convenience of users, the three parts of this report are available separately or as a set. Orders should be placed with the Publications Department, American Association of Engineering Societies, 415 2nd Street, N.E., Washington, D.C. 20002.

SUBSTITUTED DATA

No 1985 degree report was obtained by EMC for the following schools; however, 1984 reports were available, and were substituted for the missing data. When these schools appear in the tabulations, they are flagged with an asterisk (*) after the institutional "AC" (Accreditation and Control) code:

Engineering Schools

California State University at Chico*
California State University at Los Angeles*
California State Polytechnic University at Pomona**
Florida Atlantic University
Gannon University (Pennsylvania)
LaMar University (Texas)
Massachusetts Maritime Academy
Michigan Technological University
Northern Arizona University
Pacific Lutheran University (Washington)
Rensselaer Polytechnic Institute (New York)
St. Marys University (Texas)
Tuskegee Institute (Alabama)
United States Coast Guard Academy (Connecticut)
University of Alaska at Fairbanks
University of Arizona
University of Central Florida
University of Dayton (Ohio)
University of Hartford (Connecticut)
University of Lowell (Massachusetts)**
University of Miami (Coral Gables)
University of Nevada School of Mines
University of North Carolina at Chapel Hill
University of Santa Clara (California)
University of Wisconsin at Platteville
University of Wyoming

*School submitted 1984 data for 1985 survey.
**School submitted *updated* 1984 report too late to be used for that study; this updated report is used as a 1985 substitution here, which is why the substituted data is not identical to EMC's published 1984 results.

Technology Schools

(NOTE: substitutions for engineering technology schools were made only for institutions with at least one ABET-accredited course of study)

Alamance Technical College (North Carolina)
Colorado Technical College
Del Mar College (Texas)
Erie Community College (New York)
Florence Darlington College (South Carolina)
Florida International University
Franklin University (Ohio)
Greenville Technical College (South Carolina)
Guilford Technical Community College (North Carolina)
Hartford State Technical College (Connecticut)
Lawrence Institute of Technology (Michigan)
Murray State University (Kentucky)
Niagara Community College (New York)
Northern Arizona University
Norwalk State Technical College (Connecticut)
Owens Technical College (Ohio)
Rochester Community College (Minnesota)
Savannah State College (South Carolina)
SUNY A&T College at Farmingdale (New York)
Temple University (Pennsylvania)
Tri-Cities State Technical College (Tennessee)
University of Hartford (Connecticut)
University of Cincinnati (Ohio College of Applied Science)
Wake Technical College (North Carolina)

MISSING DATA

Engineering Schools

In 1985, all engineering schools tracked by EMC's degree survey supplied at least partial data (in a few cases, by telephone) or could be covered by substituting a 1984 degree survey response, as noted above. Accordingly, no estimates are needed for unreported data for all engineering graduates. Limited estimates are used in the engineering degree tabulations to deal with partial missing information on women, minorities, or foreign nationals, as noted in the Introduction.

Technology Schools

The following engineering technology schools with at least one ABET-accredited course of study were unable to supply data for EMC degree surveys in either 1984 or 1985, and no data on those graduates are included in this report.

Auburn University (Alabama)
Atlantic Community College (New Jersey)
Central Maine Vocational-Technical Institute
City College of San Francisco (California)
College of Staten Island (New York)
Houston Community College (Texas)
John Tyler Community College (Virginia)
Mankato Community College (Minnesota)
Montgomery Community College (Maryland)
New Hampshire Technical Institute
Ocean County Community College (New Jersey)
Purdue University at Kokomo (Indiana)
Roane State Community College (Tennessee)
Sumter Area Technical College (South Carolina)
SUNY College of Technology at Utica (New York)
Technical Career Institute (New York)
University of Delaware
University of Houston, Downtown Campus, (Texas)
Waters State Community College (Tennessee)
York Technical College (South Carolina)

Miscellaneous Notes

A technical change in reporting methods accounts for a drop of approximately 650 engineering B.S. degrees between 1984 and 1985, due to the adoption by the U.S. Military Academy at West Point of a system of elective major fields. In the past all of West Point's graduates were counted in engineering science. Under the new system, only one-third are classed as engineers, and these include civil, electrical, general and mechanical engineers as well as graduates in engineering science.

Schools that participated in "3-2" engineering programs, in which the initial three years of an engineering curriculum are taught locally, and the final two years are taken at traditional engineering institutions, are not included in this report. In 1984, one such school, Providence College in Rhode Island, was erroneously listed by EMC as missing from the data.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Program-level ABET Accreditation Codes: in the curriculum tables provided in Part III of this report, each program is tagged as to its status with The Accreditation Board for Engineering and technology (ABET). The codes are:

B = ABET-accredited, at bachelor degree level
M = ABET-accredited, at masters' level (such accreditations are being phased out.)
A = ABET-accredited, at associate degree level
N = Not ABET-accredited.

School-level Accreditation and Control (AC) Codes: These appear after each school's name. The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list, which was applicable for these programs at the time of the survey.) Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing next to the "AC" Code indicates that 1984 data has been used as the best estimate for 1985, as indicated above in the discussion of substitutions and estimates.

Engineering Degree Categories: The following abbreviations are used in the tables:

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories: a different set of abbreviations is used:

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

Engineering Technology Degrees by Curriculum and Degree Level—1984-85 75

INTRODUCTION

This report summarizes data on degrees awarded in engineering and engineering technology during the 1984-85 academic year. The survey covers 289 institutions offering degrees in engineering, providing comprehensive coverage of these programs in the United States. The Engineering Manpower Commission (EMC) has provided this kind of data on four-year undergraduate and graduate engineering degrees since 1967, and in general our reports on these degrees are comparable from one year to the next.

In the case of the technology degrees, EMC's data is less comprehensive. The survey covers schools with at least one ABET-accredited course of study. It also includes some degrees awarded by schools that do not have ABET-accredited courses. Since EMC has not attempted to provide 100 percent coverage of the unaccredited engineering technology programs, data for those degrees is not comparable from one year to the next.

As in the past EMC's degree report is issued in three separate volumes. Part I summarizes degrees for each school, in alphabetic order for each state, with columns for major curriculum groups, totals for the schools and states, and information on each school's accreditation and type of control (public, private, etc.). Separate tables are provided for engineering degrees at the bachelor, masters, engineering professional and doctorate levels, and for engineering technology degrees at the certificate, associate, bachelor and masters levels.

At the end of the tabulations for each degree level in Part I, a brief summary is appended of the overall numbers, across all schools and states, of degree recipients who were women, members of any of four specific minority groups (Blacks, Hispanics, American Indians, and Asians/Pacific Islanders), or foreign nationals. For more detailed school, state, and curriculum-specific data on the six groups of special interest, the separate Part II report for minorities provides information similar to the Part I tables for each of these groups of engineers.

Part III of the report, also separately bound, provides added details on curricula in engineering and engineering technology. Each of the major disciplinary groups is tabulated in alphabetic order, listing schools offering the programs and the particular program titles assigned by the schools, along with the number of degrees awarded at each level and the number of recipients at the school in each of the six special population categories. The ABET (Accreditation Board for Engineering and Technology) designation for each program is also reported. A final table summarizes all program titles within each of the major curriculum groups, listing total degrees of all types for all schools and states.

Thorough efforts have been made to eliminate errors in these statistics. Data for each school have been reviewed and compared with previous degree reports (and enrollment reports, in some cases), to isolate any unexpected or surprising changes in the production of engineering and engineering technology graduates. In a number of cases, reporting errors were identified and corrected, while in others some significant changes in patterns of degree production have been checked and confirmed. Insofar as practical, minor variations in the titles of programs (such as differences in the style of abbreviations) have been edited into a common format, to improve the clustering of similar programs in Part III of the report.

In addition, estimates and substitutions of prior year degree reports have been used, where feasible, to deal with missing data. The rules governing these adjustments are as follows:

- In the case of *engineering* degrees, schools that did not participate in the 1985 survey, but which did participate in 1984, are treated by substituting their 1984 reports for the missing information. Such schools are flagged with asterisks in the tabulations, to denote the presence of substituted 1984 data. A list of these schools appears below.

  Two schools, both members of the California State University system, submitted 1984 data for the 1985 survey. Both schools followed a similar practice in previous EMC degree studies. The use of the year-old data is explained by the schools as a function of their academic calendars. Both schools are tagged with the asterisks as substitutions, but in these cases the substitutions were initiated by the reporting institutions, not by EMC.

  A similar treatment is used for schools with *technology* programs that participated in the 1984 degree survey but did not respond in 1985, except that the substitutions are made only when the institution had at least one ABET-accredited program (both ABET-accredited and non-ABET schools are substituted, if necessary and if feasible, in the engineering degree tabulations.) These schools are also listed below.

- In the case of *engineering* degrees, when neither current nor prior-year data has been available, EMC has generated its own estimates for the total numbers of degrees awarded by all such institutions, entering in this adjustment as a separate line at the end of each set of tabulations. In the 1985 study, no engineering institution required this treatment (some schools did require estimates for missing data at the level of one or more of the six special groups, however; see below).

  In the case of the *technology* programs, a number of ABET-accredited schools were missing for both 1984 and 1985; however a review of the situation indicated that most of the missing programs were small, and it was concluded that estimates would not add appreciably to the accuracy of the results.

- In the case of *engineering* degrees, estimates have also been used to deal with problems of missing data at the level of special population groups. When the estimated data appears in tabulations, the school's name carries an "-x" suffix to flag the situation. Data cells for the school will still be reported as empty, but allowance for the school will have been made in the line at the end of the tabulation labeled "X—UNREPORTED GROUP ESTIMATE." In 1985, as noted above, these estimates appear only in tabulations of the special population groups; group estimates were not required for the overall "all graduates" level.

  In the case of the *technology* programs, EMC does not make estimates for unreported members of the six special population groups.

- Finally, some colleges were unable to provide complete details of their degree awards, but were able to supply accurate overall totals for such items as the number of women graduates at the master's level. Where feasible, EMC made use of such partial responses, pro-rating details by making use of previous degree reports, enrollment reports, and other information obtained from direct contacts with the reporting institutions. The number of these adjustments is small. They are not tagged as substitutions, nor are they flagged as estimates with the "-X" suffix after the school's name. Reports for total degrees in these cases will be accurate, although some errors may be introduced at the level of the detailed data because of the pro-rating process.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the reporting institutions.

For the convenience of users, the three parts of this report are available separately or as a set. Orders should be placed with the Publications Department, American Association of Engineering Societies, 415 2nd Street, N.E., Washington, D.C. 20002.

SUBSTITUTED DATA

No 1985 degree report was obtained by EMC for the following schools; however, 1984 reports were available, and were substituted for the missing data. When these schools appear in the tabulations, they are flagged with an asterisk (*) after the institutional "AC" (Accreditation and Control) code:

Engineering Schools

- California State University at Chico*
- California State University at Los Angeles*
- California State Polytechnic University at Pomona**
- Florida Atlantic University
- Gannon University (Pennsylvania)
- LaMar University (Texas)
- Massachusetts Maritime Academy
- Michigan Technological University
- Northern Arizona University
- Pacific Lutheran University (Washington)
- Rensselaer Polytechnic Institute (New York)
- St. Marys University (Texas)
- Tuskegee Institute (Alabama)
- United States Coast Guard Academy (Connecticut)
- University of Alaska at Fairbanks
- University of Arizona
- University of Central Florida
- University of Dayton (Ohio)
- University of Hartford (Connecticut)
- University of Lowell (Massachusetts)**
- University of Miami (Coral Gables)
- University of Nevada School of Mines
- University of North Carolina at Chapel Hill
- University of Santa Clara (California)
- University of Wisconsin at Platteville
- University of Wyoming

*School submitted 1984 data for 1985 survey.

**School submitted *updated* 1984 report too late to be used for that study; this updated report is used as a 1985 substitution here, which is why the substituted data is not identical to EMC's published 1984 results.

Technology Schools

(NOTE: substitutions for engineering technology schools were made only for institutions with at least one ABET-accredited course of study)

- Alamance Technical College (North Carolina)
- Colorado Technical College
- Del Mar College (Texas)
- Erie Community College (New York)
- Florence Darlington College (South Carolina)
- Florida International University
- Franklin University (Ohio)
- Greenville Technical College (South Carolina)
- Guilford Technical Community College (North Carolina)
- Hartford State Technical College (Connecticut)
- Lawrence Institute of Technology (Michigan)
- Murray State University (Kentucky)
- Niagara Community College (New York)
- Northern Arizona University
- Norwalk State Technical College (Connecticut)
- Owens Technical College (Ohio)
- Rochester Community College (Minnesota)
- Savannah State College (South Carolina)
- SUNY A&T College at Farmingdale (New York)
- Temple University (Pennsylvania)
- Tri-Cities State Technical College (Tennessee)
- University of Hartford (Connecticut)
- University of Cincinnati (Ohio College of Applied Science)
- Wake Technical College (North Carolina)

MISSING DATA

Engineering Schools

In 1985, all engineering schools tracked by EMC's degree survey supplied at least partial data (in a few cases, by telephone) or could be covered by substituting a 1984 degree survey response, as noted above. Accordingly, no estimates are needed for unreported data for all engineering graduates. Limited estimates are used in the engineering degree tabulations to deal with partial missing information on women, minorities, or foreign nationals, as noted in the Introduction.

Technology Schools

The following engineering technology schools with at least one ABET-accredited course of study were unable to supply data for EMC degree surveys in either 1984 or 1985, and no data on those graduates are included in this report.

Auburn University (Alabama)
Atlantic Community College (New Jersey)
Central Maine Vocational-Technical Institute
City College of San Francisco (California)
College of Staten Island (New York)
Houston Community College (Texas)
John Tyler Community College (Virginia)
Mankato Community College (Minnesota)
Montgomery Community College (Maryland)
New Hampshire Technical Institute
Ocean County Community College (New Jersey)
Purdue University at Kokomo (Indiana)
Roane State Community College (Tennessee)
Sumter Area Technical College (South Carolina)
SUNY College of Technology at Utica (New York)
Technical Career Institute (New York)
University of Delaware
University of Houston, Downtown Campus, (Texas)
Waters State Community College (Tennessee)
York Technical College (South Carolina)

Miscellaneous Notes

A technical change in reporting methods accounts for a drop of approximately 650 engineering B.S. degrees between 1984 and 1985, due to the adoption by the U.S. Military Academy at West Point of a system of elective major fields. In the past all of West Point's graduates were counted in engineering science. Under the new system, only one-third are classed as engineers, and these include civil, electrical, general and mechanical engineers as well as graduates in engineering science.

Schools that participated in "3-2" engineering programs, in which the initial three years of an engineering curriculum are taught locally, and the final two years are taken at traditional engineering institutions, are not included in this report. In 1984, one such school, Providence College in Rhode Island, was erroneously listed by EMC as missing from the data.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Program-level ABET Accreditation Codes: in the curriculum tables provided in Part III of this report, each program is tagged as to its status with The Accreditation Board for Engineering and technology (ABET). The codes are:

B = ABET-accredited, at bachelor degree level
M = ABET-accredited, at masters' level (such accreditations are being phased out.)
A = ABET-accredited, at associate degree level
N = Not ABET-accredited.

School-level Accreditation and Control (AC) Codes: These appear after each school's name. The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1984 list, which was applicable for these programs at the time of the survey.) Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing next to the "AC" Code indicates that 1984 data has been used as the best estimate for 1985, as indicated above in the discussion of substitutions and estimates.

Engineering Degree Categories: The following abbreviations are used in the tables:

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories: a different set of abbreviations is used:

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental
